The barstock table is ideally suited for checking lengths of cut tubes, boards, or extrusions.

For simple cut-to-length measurements on linear products like tubing, extrusions, bar stock, and wood beams, the barstock table provides accurate measurements in a rugged and simple to use package.

The barstock table comes with cast and ground V-blocks capable of supporting 6 inch diameter materials.

The barstock table has cast angle plates on both ends with hardened steel inserts for long-term durability. These plates will cover a full 6 inch diameter part.

Standard lengths: 36, 48, 72, 96, 120, 144 inches
Custom lengths available.
