

- **ULTRA-HIGH PRECISION, FAST LASER SCANNER**
- **CLEANEST 3D DATA CAPTURE FOR MINIMUM POST-PROCESSING TIME**
- **IDEAL FOR CONSTRUCTION, INSPECTION AND PRODUCT DESIGN**

The fastest, most accurate laser scanner for capturing large objects such as wind turbines, ship propellers, airplanes and buildings. Producing 3D data of the highest quality, Artec Ray scans with submillimeter distance accuracy and best- in-class angular accuracy.

Furthermore, data capture is cleaner than that from any other 3D scanner of this type, with noise levels at an absolute minimum. This speeds up post-processing significantly, making it a hassle free job.

EASY 3D SCANNING, HIGH PRECISION RESULTS

Scanning with Artec Ray is easy - just place it on a tripod in front of your object and press the button! Portable and compact, you can set it up indoors or outdoors, without need for a power source, since the internal battery will last you for up to 4 hours.

THE FULL 3D SCANNING PACKAGE

Pair it with an Artec handheld scanner, such as Eva or Spider, to scan difficult to reach areas, e.g. the interior of a car, or to easily add intricate detail to a large-scale 3D model. Armed with Artec Ray and an Artec handheld scanner, there will be virtually no limits to what you can capture in 3D.

SOFTWARE

Scan and process directly in the powerful Artec Studio, then seamlessly export to Geomagic Design X.
